AI-Driven Workflow Tools
Data Visualization

CORE COMPETENCIES

Analytical Skills
Problem Solving
Manages Complexity
Drives Results
Resourcefulness
Communicates Effectively
Collaborates
Presentation Skills
Persistence

EMPLOYMENT HISTORY

Specialist · Apple Inc.

Aug 2025 - Present

- Benchmarked AppleCare pricing and coverage terms against competitor warranty products, translating the cost versus repair risk tradeoff into clear recommendations customers could act on.
- Trained and onboarded new Specialists on customer engagement techniques.
- Partnered with the Apple Business Team to guide business customers through account setup and financing.

Financial Analyst · Essentials LLC

Apr 2025 - Feb 2026

- Developed monthly revenue and cost forecasts using advanced Excel models, managing the monthly budget to support OpEx planning, cash flow forecasting, and financial decision-making.
- Prepared variance analysis reports (budget vs. actual) to identify cost drivers, margin trends, and financial risks in support of departmental financial planning.
- Built and automated KPI dashboards in Excel and Power BI, eliminating manual reporting workstreams and improving financial visibility for leadership.

Financial Analyst · Independent E-Commerce Operations

Mar 2022 - Feb 2025

- Built financial forecasting models to project revenue, COGS, and gross margin across a \$200K annual e-commerce operation, supporting OpEx planning and margin management.
- Monitored product-level profit margins and conducted trend and variance analysis to evaluate pricing strategies and inventory investment decisions.
- Developed Excel-based tracking tools to monitor capital allocation, ROI, and demand volatility risks to protect margins.

Financial Analyst, P&L & Risk Management · Imperial Pawnbrokers

Feb 2022 - Present

- Perform risk profile analysis on high-value collateral loans, evaluating asset worth, market liquidity, and borrower exposure to protect the company's financial position and minimize downside risk.
- Build and maintain Excel-based P&L dashboards across retail operations and an eBay e-commerce business, delivering real-time visibility into profitability, cost drivers, and margin performance.

PORTFOLIO PROJECTS

- Finance Portfolio** (jrejl.github.io/FinancePortfolio): six practice case studies on fictional companies, each an Excel model with live formulas and a checks sheet, covering three statement models, EVM, DCF valuation, standard costing, fund accounting and a month end close.
- Python for Finance**: four pandas analyses on the case data, including a 10,000 run cash simulation that sizes a revolver draw and an EVM estimate at completion forecast.

EDUCATION

Bachelor of Arts in Finance · CSU Dominguez Hills (2023-2025)

Associate of Arts in Business Administration · Fullerton College (2020-2022)

Certifications: Excel Advanced Certification | Power BI Data Analyst Certification
